Bringing Services and Technologies Together:

The Future of Remote Monitoring Will Never be the Same
Letter from Co-CEOs

Fellow Stakeholders,

September 2015 marks the one-year anniversary of Preventice Solutions’ foundation. So what have we accomplished in 2015?

Success speaks throughout this journey and we are proud of the amazing results our teams achieved in just our very first year!

Changing our corporate name was an important milestone to create THE Preventice Solutions brand while aligning our new look and feel. We continue to build our visual identity. Most importantly, we stayed focused on unifying our employees and streamlining our businesses without having to resort to extensive changes to seek synergy. Our principal operating companies, eCardio and Preventice have now become Preventice Services and Preventice Technologies. The new brand and entity structure positions us well for a dynamic future.

We believe this synergy is critical. A company’s culture is about all the shared values and behaviors that determines how people perform individually and as a team. We defined our functional and cultural objectives, diagnosed the differences, then developed a fully integrated organization operating as one enterprise platform. We have total confidence in our teams who built a sustainable strategy that excites employees about the future. This integration of the two cultures is one we now want to build on through the focus on salesforce execution during the rest of 2015 and into 2016.

As we move forward in our journey, we bring forward the sales growth opportunities of our newly launched BodyGuardian® Heart and BodyGuardian® Holter. BodyGuardian® Heart is a mobile cardiac telemetry monitor. Its monitoring system is a cutting edge approach that allows monitoring more than just standard ECG. The system can additionally include weight, blood pressure, glucose and SpO2 monitoring which supports physicians in the treatment plans potentially easing stress and improving adherence.
We also know that an additional opportunity for a new monitoring solution emerges by year end: “PatientCare”, our cloud-based technology platform that increases physician-patient engagement and sets a potential key backbone from early screening and detection, through recovery, and maintenance. This platform helps health care professionals and will improve patient outcomes, to quite simply, make it easier for people to stay healthy. These product and integration successes have enabled our sales to continue to grow at greater than market rates.

For Preventice Solutions to deliver on its vision, it is crucial that our new product development process is lean, efficient and reduces cycle times. Innovation and access are the two pillars in our IT and R&D departments for how we try and judge where to spend our time. Two good examples are the launch of BodyGuardian® Heart and the kick off of PatientCare, where in both cases Preventice Solutions leads. Improving our technologies will be critical to strengthen the future growth of the company.

To this end, the enhancement of service planning and governance delivery was critical this year. This framework will improve speed to market, more appropriate levels of risk control and better return on investment. We also have started to embolden new partners in achieving their mission:

- Launching a cloud-based electrocardiogram (ECG) analytics program with AliveCor.
- Working with STMicroelectronics to develop BodyGuardian® Remote Monitoring System.
- Supporting the commercial delivery of Medibio’s Circadian Heart Rate tests to assist clinicians with the diagnosis of depression, workplace stress, and other mental health disorders.
- Providing back end support and monitoring service to JointMetrix, an innovative leader in monitoring patients post joint replacement surgery.

During the last months of this initial year, Boston Scientific has become a significant shareholder and will become the exclusive worldwide sales and marketing representative for Preventice Solutions. This investment has a very substantial impact on the company. It changes the shape of the business and delivers benefits through synergies. Critically, it is an important part of rebalancing the group’s future.

One of the aspects of the company that we are very proud of is our dedicated employees. We have undoubtedly integrated a diverse range of skilled staff—from technicians to engineers gaining foothold on their growing career. A tangible success achieved this year was consolidating and improving our 401k and medical plans while integrating as one payroll/HR platform. When employees are included in making changes that may be affecting their career, developing their skills and enhancing their benefits, a sense of organizational ownership is also created. Ownership creates the desire to succeed and take pride in the company. We are pleased to report that our workforce grew substantially to 536 during the year.

We now embark upon the last months in 2015, the chance to expand our vision provides a rare opportunity to exploit digital technologies, catalyze remote monitoring service offerings and explore additional partnerships. We will constantly challenge ourselves to find novel solutions that improve patients' wellbeing and better serve our customers. Those outcomes will be specially designed around deep insights uncovered from truly listening to patients and health care providers.

Thank you for your continued interest in and support of Preventice Solutions.

Sincerely,

Jon Otterstatter & John Untereker
Better Care Better Outcome

Our Vision

Preventice Solutions delivers a superior combination of remote monitoring technologies and services to patients, providers, payers, and life science companies. Together with our partners, we raise the quality and cost effectiveness of care and enhance the ongoing management of patients suffering from cardiac-related issues and other health disorders.

Our Mission

Become the leader in providing broad-based effective healthcare solutions utilizing portfolio of services and technologies

Deliver best continuity of care and improve health outcomes

Engage and support individuals in their care plan process

WHY we exist

To raise the quality and cost effectiveness of remote patient care

AND

To enhance the management of patients burdened by cardiac-related issues and associated health disorders

WHAT we promise

To put our values at the heart of every decision we make.

HOW we will achieve this

Strengthen content and engagement

Align Enterprise Priorities

Improve our listening and analysis
What Do We Do?

- Service practices and health care professionals: collect, generate, and summarize health data received from remote sensors, and other systems for clinical and analytical purposes.

- Intelligently filter mobile health data, based on the direction of the physician, and selectively integrate it into EMR and other clinical systems to support optimal clinician workflows.

- Partner with global leaders in health care to build world-class remote monitoring solutions.
What Sets us Apart?

**UNRIVALED SERVICE**
A superior customer experience for both patients and physicians enable deeper relationships and improved outcomes.

**INNOVATIVE SOFTWARE**
HIPAA-compliant care platforms leverage the latest in reporting technology, patient education, and organizational workflows to improve efficiency and care quality.

**STATE-OF-THE-ART SENSORS**
Innovative remote monitoring technologies help physicians gain deeper insights into their patients' health and lifestyles through the collection of near real-time data.

Our 360° approach includes:
Our Group of Companies

# Our History

**PREVENTICE SERVICES**

- Preventice Services formerly known as eCardio Diagnostics is founded
- 1st patient is enrolled
- Greater than 10,000 patients enrolled
- eVolution: single-component cardiac monitoring system is presented
- Greater than 100,000 patients enrolled
- Significant investment from Sequoia Capital is received
- NEW Atrial Fibrillation Information System is launched
- 1st AMS customer
- Named as one of Houston’s Fastest Growing Technology Companies
- Three prestigious awards are granted
- Partnership with AT&T is announced
- First to market Wireless CEM
- First mobile cardiac telemetry service is launched
- Listed among Honorees of the Houston Business Journal's Fast 100 List
- The “Use of Mobile Cardiac Telemetry to Improve Diagnostic Accuracy & Enable More Efficient Patient Care” manuscript is published
- Physician Portal receives Merit Award from Web Health Awards
- Named to the Inc. 500|5000 List
- Verité Monitor is released as MCT and CEM
- Merck GHIF invests in the strategic combination of Preventice Solutions
- Second Diagnostic Testing Facility is opened

**PREVENTICE TECHNOLOGIES**

- **2004**
  - Preventice Technologies formerly known as Boost Information Systems is founded

- **2005**
  - Greater than 10,000 patients enrolled

- **2006**
  - eVolution: single-component cardiac monitoring system is presented

- **2007**
  - Greater than 100,000 patients enrolled

- **2008**
  - Preventice Technologies formerly known as Boost Information Systems is founded

- **2009**
  - Significant investment from Sequoia Capital is received
  - NEW Atrial Fibrillation Information System is launched
  - 1st AMS customer
  - Named as one of Houston’s Fastest Growing Technology Companies
  - Three prestigious awards are granted
  - Partnership with AT&T is announced
  - First to market Wireless CEM
  - First mobile cardiac telemetry service is launched
  - Listed among Honorees of the Houston Business Journal's Fast 100 List
  - The “Use of Mobile Cardiac Telemetry to Improve Diagnostic Accuracy & Enable More Efficient Patient Care” manuscript is published

- **2010**
  - BodyGuardian Heart is demonstrated for the first time

- **2011**
  - BodyGuardian Heart ISO 13485: 2003 certification and CE mark clearance are received
  - BodyGuardian Heart commercial availability is announced

- **2012**
  - Samsung provides specialized smartphone for BodyGuardian Heart
  - Partnership with STMicroelectronics is announced to power the new BodyGuardian Remote Monitoring System
  - BodyGuardian Heart Remote Monitoring System is cleared by U.S. Food and Drug Administration (FDA)

- **2013**
  - BodyGuardian Heart ISO 13485: 2003 certification and CE mark clearance are received
  - BodyGuardian Heart commercial availability is announced
  - 1st PatientCare Customer

- **2014**
  - First Commercial agreement is signed
  - 6 patents are filed
Introducing Preventice Solutions new corporate brand and logo. The rebranding reflects both the evolution of the company as well as its vision for the future.

- AliveCor and Preventice Solutions launches Pilot Cloud-Based Analytics Program
- Preventice Services SOC 2 compliance audit report is released
- Preventice Technologies has filed 6 patents
- Preventice Services has launched BodyGuardian Holter
- BodyGuardian Heart Remote Patient Monitoring System is now launched to Preventice Services accounts for Mobile Cardiac Telemetry (MCT) and Cardiac Event Monitor (CEM)
- Preventice Solutions receives major investment from Boston Scientific

Our Sensors

With advances in wireless, non-invasive sensor technology and the growing adoption of smartphone and cellular technology, health care institutions are empowered to gain valuable insight into the near real-time health of at-risk or chronic patients. By passively or actively collecting data from patients wherever they are, providers can realize benefits from reduced re-admissions to shortened hospital stays to improved clinical outcomes.

Preventice Solutions' portfolio include the BodyGuardian® range of products i.e. BodyGuardian® Heart, BodyGuardian® Verité and BodyGuardian® Holter to support health care practices enabling a seamless connection between patient and provider. Cardiac Monitoring sensors include wearable monitors that detect and record heart rhythms such as Holter, cardiac event monitors (CEM), mobile cardiac telemetry (MCT). These products are often surrounded by monitoring services including data transmission, surveillance, reporting, interpretation, and integration into a provider's workflow.

BodyGuardian® Heart

This state-of-the-art, dual-component sensor offers full convertibility between mobile cardiac telemetry (MCT) and cardiac event monitoring (CEM) to automatically detect and capture data.

BodyGuardian® Verité

A single component, dual-modality remote cardiac sensor features both mobile cardiac telemetry (MCT) and cardiac event monitoring (CEM), providing physicians with a seamless transition between telemetry and event modes.

BodyGuardian® Holter

A compact portable device that continuously records and stores ECG for later analysis. It allows for 3-channel pulse detection. Moreover real time ECG display provides immediate validation of the patient hook-up having a service for 24 hours.
Three innovative service platforms allow healthcare providers to tailor their monitoring capabilities to fit organizational needs while improving patient outcomes.

1. **PatientView Portal**

This interactive services-based platform integrates with all BodyGuardian® sensors. It allows healthcare organizations to benefit from the expertise and convenience of Preventice Services’ Monitoring Center.

2. **PatientFlow Portal**

This individualized platform integrates with all BodyGuardian® sensors and allows providers to benefit from the expertise and convenience of Preventice Services’ Monitoring Center. It facilitates procedural effectiveness and supports practice protocols.

3. **PatientCare Portal**

Designed for use with the BodyGuardian® Heart sensor, this self-managed platform allows providers to gather, interpret and manage patient data independently.

Boston Scientific Announces Equity Investment and Sales Corporation Agreement with Preventice Solutions

Released: August 3, 2015

MINNEAPOLIS and HOUSTON -- Boston Scientific (NYSE: BSX) has become a significant shareholder and will become the exclusive worldwide sales and marketing representative for Preventice Solutions for cardiology-related diagnostic and monitoring offerings. For more information, visit http://www.prnewswire.com/news-releases/boston-scientific-announces-equity-investment-and-sales-cooperation-agreement-with-preventice-solutions-300122816.html

Preventice Solutions launches BodyGuardian with BodyGuardian Remote Patient Monitoring System in the United States

Released: May 11, 2015

MINNEAPOLIS and HOUSTON -- Preventice Solutions announced today that BodyGuardian® Heart Remote Patient Monitoring System and PatientCare platform will be commercially available in Q3, 2015. Testing with the BodyGuardian® Remote Monitoring System is underway nationally to ensure ongoing improvements and care team efficiency. It will target the use of remote monitoring including:

• Post-surgical cardiac patients to evaluate how monitoring cardiac rhythms remotely influence all phases of recovery.
• 24/7 continuous monitoring of infrequently symptomatic patients as they go about their daily lives, with the objective of detecting potential arrhythmias.

The Future of Remote Monitoring Will Never Be the Same

Released: March 10, 2015

MINNEAPOLIS and HOUSTON -- Preventice Solutions announced today that it will participate in the ACC.15, hosted by the American College of Cardiology on March 14-16, 2015 in San Diego, CA. Preventice Solutions will showcase its solutions for remote patient monitoring, education and engagement technologies.

Preventice and eCardio Diagnostics Announce Strategic Combination in Cardiac Patient Monitoring Market

Released: September 9, 2015

MINNEAPOLIS and HOUSTON -- Preventice, developer of the PatientCare™ Platform and the BodyGuardian® Remote Monitoring Sensor and an innovator in software solutions for remote patient care, and eCardio Diagnostics® LLC, a leading provider of remote cardiac monitoring products and services, announced today a strategic combination of Preventice and eCardio to drive innovation and growth in remote monitoring systems and mobile health applications. The two companies will now operate as wholly-owned subsidiaries of a newly formed holding company, Preventice, Inc.
